

New Mexico EyeCare is proud to provide our patients with the most highly advanced technology available in retinal screening today! Our ability to view your internal retinal health is now dramatically improved with the Optomap.

Our doctors are concerned about retinal problems such as macular degeneration, glaucoma, retinal holes or detachments and diabetic retinopathy (all of which can lead to partial loss of vision or blindness). Additionally, systemic diseases such as diabetes and high blood pressure can be detected during a retinal exam.

EARLY DETECTION IS CRUCIAL!!

Optomap Provides:

- ⌘ An annual eye wellness scan
- ⌘ An in depth view of the retinal layers (where disease can start).
- ⌘ The ability to show you your images today during your exam.
- ⌘ A permanent record for your medical file, which gives your doctor comparisons for tracking and diagnosing potential eye disease.

Optomap:

- ⌘ Is fast, easy, and comfortable. Actual scanning time is only a quarter of one second.
- ⌘ **Will NOT require dilating drops (which result in blurred vision and sensitivity to light).**

The doctors at New Mexico EyeCare would like for ALL of their patients to have an Optomap exam annually. **The additional fee is only \$34.99.** (Not covered by insurance)

I elect to have an Optomap of my retina.
